VARDHAN
GROUP

Founder's Words

At Vardhan Group, we are proud to offer a wide range of high-quality products including screws, drawer channels, hinges, locks, door rollers, and other home & kitchen accessories et al. In addition, we are also dedicated to manufacturing high-quality stainless-steel pipes. As the founder of this company, I am driven by the desire to provide exceptional customer service and ensuring that our products meet the highest standards of quality and durability. We take great pride in offering reliable and innovative solutions for all of your hardware needs.

We are constantly striving to improve and expand our product line, and we are committed to delivering the best possible service to our customers. Thank you for choosing us as your hardware partner. We look forward to continue to serve you in the future and help you bring your projects to life.

Pawan Kumar Rungta
Founder of Vardhan Group

Know Us

Established in Jaipur for over 15 years, our hardware company has built a reputation for excellence in the manufacturing of Welded Stainless Steel (SS) pipes and the import and trade of a wide range of hardware solutions for every need. From screws and hinges to drawer channels and modular kitchen accessories, we offer a diverse selection of high-quality products to meet the needs of both residential and commercial customers. With a commitment to innovation and customer satisfaction, we are dedicated to providing our customers with the best hardware solutions available at unbeatable prices.

Our company specializes in the distribution of high-quality hardware products, including stainless steel pipes, screws, locks, hinges, inlays, drawer channels, and kitchen baskets et al you need to build, maintain, and improve your home or business. We pride ourselves on offering a wide selection of durable and long-lasting products to meet the needs of both residential and commercial customers. We believe in building strategic and mutually benefiting partnerships and relationships with suppliers, manufacturers, and other industry partners like contractors, real-estate builders, etc.

Channels

A telescopic channel or drawer channel is a type of linear motion mechanism that allows for the extension and retraction of a shaft or sleeve within a housing. It is commonly used in applications that require adjustable length, such as in conveyors, telescopic booms, and machine tools. The channel is usually made of metal and is designed with a smooth interior and exterior surface to allow for smooth and efficient movement of the shaft.

Mount - Economic Range Drawer Channel

Sizes Available

Door Stoppers

Door stoppers are an essential hardware item that helps to prevent damage to walls and doors. They are designed to keep doors from swinging open too far, which can cause damage to the door or wall or create a tripping hazard. Door stoppers come in a variety of styles and materials. Some door stoppers are designed to be mounted to the wall or floor, while others are free-standing and can be placed wherever needed. Door stoppers are a simple and effective way to protect your home and keep your doors in good working order. Whether you need a door stopper for a residential or commercial space, there is a door stopper available to meet your needs.

Mount - Exclusive Quality Stainless Steel Door Lock

Features & Specifications

- Long lifespan
- Easy to install
- Resistant to corrosion
- Made from high-grade stainless steel
- Designed with a robust locking mechanism
- For standard doors and easy to operate

Sliding Door Rollers

Sliding door rollers are a type of hardware that is used to allow sliding doors to move smoothly and easily. They are typically made of metal or plastic and consist of a wheel or roller mounted in a housing, which is attached to the door. The roller is designed to run along a track or guide, allowing the door to slide back and forth with minimal effort. Sliding door rollers come in a variety of sizes and styles to suit different door types and applications, and can be used in both residential and commercial settings. They are typically easy to install and maintain, and can help to extend the life of your sliding doors. Whether you need sliding door rollers for a new construction project or a renovation, there is a roller available to meet your needs.

Mount - 4/8 Wheel Door Roller for C-Channel

Features & Specifications

- Noise-Free

- Smooth & polished finish
- Simple and straightforward installation process

Mount - New Soft-Close Double-Track Roller

Features & Specifications

- Sleek and modern design
- Cutting-edge sliding door solution
- Smooth and gentle closing action
- Provides increased weight capacity and stability

Mount - Double Track Sliding Roller (Normal)

Features & Specifications

- Easy to install and operate
- Guaranteed longevity & reliability
- Minimalist and unobtrusive design
- Excellent performance and durability
- Ensures increased weight capacity and stability

Mount - Soft-Close Double Track Sliding Roller

Features & Specifications

- Easy to operate
- Noise elimination feature
- Enhances the aesthetic appeal
- Compatible with a wide range of door types
- Useful for a variety of settings, including homes, offices, and commercial spaces

Mount - 8-Wheel Soft-Close Roller for C-Channel

Features & Specifications

- Easy installation
- Sleek modern design
- Made of high-quality materials
- Perfect fit for doors of different sizes

Hinges

A hydraulic hinge is a type of hinge that uses a hydraulic piston to control the opening and closing of a door or lid. It provides a smooth and controlled motion, and can be adjusted to control the speed and resistance of the movement. They are commonly used in high-end cabinets, doors, and lids, where a soft-close feature is desired.

Mount - Exclusive Quality Clip-On Hydraulic Hinge

Rotation : 0° 8° 15°
(In Degrees)

- Sturdy and reliable pipes
- Bending and cracking resistance.
- Outstanding quality and performance

Mount - Oval Pipe

Features & Specifications

- Multi-purpose uses
- Sturdy and reliable pipes
- Bending, and cracking resistance
- Outstanding quality and performance

Butt Hinges

Butt hinges are a type of hardware that is used to attach two objects together allowing them to pivot around a central axis. They are often used to attach doors to door frames but can also be used for other applications such as attaching cabinet doors or other pieces of furniture. Butt hinges come in a variety of sizes and styles to suit different applications and are typically made of metal such as steel or brass. They are designed to be strong & durable, and can withstand the weight and wear & tear of daily use. Whether you need butt hinges for a residential or commercial application, there is a hinge available to meet your needs.

Atari - Stainless Steel (2 Pin) Hinges

Features & Specifications

- Easy to install and use
- Made with high-grade stainless steel
- Useful for doors, windows and cabinets
- More stable to standard single-pin hinges
- Delivers outstanding performance and quality

Jackpot - Stainless Steel (Concealed) Hinges

Features & Specifications

- Easy to install and use
- Seamless and sleek appearance
- Made with high-grade stainless steel
- Clean, modern and sophisticated design

Jackpot - Stainless Steel L-Hinges

Features & Specifications

- Easy to install
- Durable and strong
- Sleek and low-profile in design
- Provides long-lasting & reliable performance
- Corrosion-resistant and made from high-quality stainless steel

Modular Kitchen

Fittings

Modular kitchen baskets are storage units that are designed to fit into a modular kitchen cabinet and they can be easily installed and configured as per specific requirements. They come in a variety of sizes and shapes, and are typically made of stainless steel or wire mesh, which makes them durable and long-lasting.

On the other hand, Tandem boxes are pull-out storage units for kitchen cabinets. They consist of two or more baskets that slide in and out on a single runner, making it easy to access items stored in the back of the cabinet. Tandem boxes are typically made of stainless steel or other durable materials, and are available in different sizes and configurations to fit different cabinet sizes and storage needs. They are a practical and convenient solution for organizing kitchen items and maximizing storage space.

- Saves time and increases kitchen efficiency
- Organizes and separates different kitchen items
- Customizable sizing options to fit specific needs

Uninox - Kitchen Baskets

Cutlery, Plain, Thali, Cup & Saucer, Bottle Pullouts

Features & Specifications

- Easy installation
- Space-saving design
- Efficient organization for kitchen items
- High-quality stainless steel construction
- Aesthetic appeal with sleek and modern design
- Smooth and easy pull-out function for convenient access to items

Tandem Box with Square Gallery

Features & Specifications

- Soft closing action
- Long lasting & durable mechanism
- Smooth click mechanism to pull drawer
- Easy installation and for effortless closing
- High load capacity to store all kitchen products

Slim Tandem Box

Features & Specifications

- Slim drawer system
- Slimmest in its class
- Quick installation and dismantle
- Quite and smooth sliding performance
- Easy to remove drawer from channel for drawer cleaning purposes

Screws

Screws are a type of fastener that are used to mechanically join two or more objects together. They consist of a helical shaft with a pointed tip and a threaded outer surface that is designed to be inserted into materials such as wood, metal or plastic, and tightened using a tool such as a screwdriver. Screws are an essential component of many construction and repair projects as they provide a secure and reliable means of attaching objects together. There are various types of screws for different applications. Whether you require screws for a residential or commercial undertaking, there is a screw available to suit your needs.

Black Drywall Screw

Features & Specifications

- Offers a level of protection
- Can be maintained effortlessly
- Won't rust, rot, crack and bend
- Highly durable and available in high-end finish

Chipboard Screws

Features & Specifications

- Long service life
- Ensures narrow grip
- High tensile strength
- Avoid crackings and splitting
- Deep and sharp thread for cutting through wood cleanly

SS Polish Drywall Screws

Features & Specifications

- Sharp point
- Strong pull strength
- Deeper thread prevents from dislodging
- Bulge head provides additional control

SDS Trusthead Screw

Features & Specifications

- High surface hardness
- Strong corrosion resistance
- High locking performance
- Carburized & tempering treated

SDS Helix (Flathead) Screw

Features & Specifications

- Easy to use
- Anti friction coating
- Excellent corrosion resistance
- Self drilling point, no need for pre-drilling

SDS Hex Screw

Features & Specifications

- Allows correct tapping at high drilling speed
- Manufactured from ultra tough carbon steel
- Cold Forged & heat treated for extra strength & durability
- Unique drill point to maximize performance with minimum efforts
- Hardened drill point enables screws to drill through steel and lead threads

Sliding Door Profiles

Sliding door profiles are a type of hardware that is used to create sliding doors. They are typically metallic and are designed to be strong and durable, able to withstand the weight and wear and tear of daily use. Sliding door profile comes in a variety of sizes and styles to suit different door types and applications, and can be used in both residential and commercial settings. They are typically easy to install and can be used to create a wide range of sliding door configurations, including single doors, double doors, and pocket doors. Whether you need sliding door profiles for a new construction project or a renovation, there is a profile available to meet your needs.

Double Track Sliding Profile

Features & Specifications

- Offers a level of protection
- Can be maintained effortlessly
- Won't rust, rot, crack and bend
- Highly durable and available in high-end finish

Double Track (Soft Close) Sliding Profile

Features & Specifications

- Matte Finish
- High Grade & Rust Free
- Offers a level of protection
- Can be maintained effortlessly

C-Profile

Features & Specifications

- Offers high load capacity
- Lightweight and easy to handle
- Provides good structural support
- Strong, durable aluminium support
- Consistent quality standards maintained

T-Profiles/Inlays

A T-profile or T-inlay is a type of architectural or decorative feature that resembles the letter "T" in shape. It is typically made of metal or plastic and is used to add a decorative touch or reinforce the edges of surfaces. T-profiles or T-inlays can be used in a variety of applications, such as edge banding for furniture, floor transitions, or to enhance the appearance of walls and ceilings. They can come in a variety of designs, finishes, and materials to match different decor styles and requirements.

Aluminum Inlay T Profile

- Gold
- Rose Gold
- SS Finish

Features & Specifications

- Low maintenance requirement
- Lightweight and durable for easy handling
- Versatile in many applications for flexibility
- Provides aesthetic appeal for design options
- Easy to install and fabricate for convenience
- Provides structural support for stability
- High strength-to-weight ratio for efficient construction

Stainless Steel PVD Coated T-Profiles

- Gold
- Rose Gold
- SS Finish
- Black

Features & Specifications

- Lower maintenance cost
- Long term cost savings
- Uniform and conformal coating
- Easy to clean and sanitize for hygiene
- More environmentally friendly than traditional

Gas Pumps

They are designed to lift and lower the bed using hydraulic pressure, allowing the user to easily change the bed's position and find a comfortable sleeping or sitting position. Bed fitting hydraulic pumps are typically made of metal and are designed to be durable and reliable. They come in a variety of sizes and styles to suit different bed types and can be easily installed by a professional or handy individual. Whether you need a bed fitting hydraulic pump for a residential or commercial application, there is a pump available to meet your needs.

Mount - Gas Pump

Features & Specifications

- Healthy spray paint surface

Bed Fitting

Features & Specifications

- Highly efficient and trustworthy
- Pneumatic Lifter Mechanism system
- Long brackets provided for better support
- Offers the versatility of a wide range of forces
- Provides controlled way of storing and releasing energy as smooth
- Simple mounting, speed-controlled damping, and cushioned end motion

Aluminium G-Profiles

Aluminum G-profiles are structural shapes that resemble the letter "G" in cross-section. They are made of aluminum, a lightweight and durable metal, and are used in a variety of applications that require both strength and stability. Common uses of aluminum G-profiles include framing for doors, windows, and cabinets, as well as support structures for shelves, displays, and other fixtures. They can be easily cut and customized to fit specific requirements, making them a versatile and cost-effective building solution.

G-Profile

Features & Specifications

- Long service life
- High strength
- Non-corrosive
- Sturdy design
- Quick installation
- Low cost and rich designs
- Maximizes countertop surface area
- Maximizes cabinet storage capacity

Colours Available

- Black
- Champagne
- Matte
- Rose Gold
- CP (Chrome Polish)

Stainless Steel Wire Mesh

Wire mesh is a type of wire cloth made from interwoven stainless steel wires. It is known for its high resistance to corrosion, making it ideal for use in harsh and corrosive environments. Stainless steel wire mesh is used in a wide range of applications, including filtering and sieving, security and protective barriers, and architectural and decorative features. It can be made in different mesh sizes and wire diameters to meet specific needs, and is commonly available in rolls or sheets for easy installation.
